EDUCATION

Wilfrid Laurier University
Bachelor of Science in Data Science

Waterloo, ON
Sept 2024 - June 2028

EXPERIENCE

Data Analytics Instructional Assistant

Sept 2025 – Dec 2025

Wilfrid Laurier University

Waterloo, ON

- **Improved accuracy of analyses** by guiding students in applying statistical tests (t-test, chi-square, ANOVA), resulting in more reliable project findings.
- **Enhanced project performance** by training and evaluating predictive models (linear regression, decision trees) in R, enabling students to achieve higher model accuracy.
- Strengthened analytical outcomes by **teaching students to apply statistical methods (hypothesis testing, regression, ANOVA)**, resulting in more accurate interpretation of data trends.

Software Developer & Data Analytics

July 2025 – Present

Teachtrack AI

Toronto, ON, Canada

- **Streamlined ETL workflows** as measured by a 25% reduction in manual data handling, by automating pipelines in Python, SQL, Flask, and HTML for multiple datasets.
- **Improved data accuracy and accessibility** by designing and managing relational databases.
- **Increased personalized teaching support** as measured by user adoption rates, by integrating predictive analytics and statistical models into the AI platform.

Math Tutor

Sept 2024 – Present

Varsity Tutor

Remote

- **Improved test performance by up to 20%** through personalized study plans based on performance data.
- **Clarified complex math and statistics concepts** with simple, accessible explanations.
- **Increased concept retention** by translating abstract theories into practical, real-world examples.

PROJECTS

Fitness Exercise Predict | *Python, pandas, NumPy, Dask*

Remote

- **Visualized smartwatch sensor data** to uncover exercise-specific motion patterns.
- **Improved model performance** by applying feature engineering, tuning hyperparameters, and testing multiple algorithms to optimize predictions from motion data.
- **Achieved 99.6% prediction accuracy** in classifying user exercises by training and validating a machine learning model on motion datasets, enabling reliable real-time activity recognition for wearable devices.

Full Stack E-commerce Web app | *Python, HTML, React, Typescript, API*

Remote

- **Developed a responsive e-commerce web app** with product listings, shopping cart, and secure checkout.
- **Built a scalable backend API** to handle user authentication, order processing, and database management, ensuring smooth transaction workflows and reliable data handling across the platform.
- **Optimized server performance, reducing response time by 25%** as measured by API benchmarks, by refining backend logic, optimizing queries, and implementing caching strategies.

Eventfinder | *Python, Flask, React, PostgreSQL, Docker*

Remote

- **Integrated external APIs for real-time event listings** with search and category filters.
- **Developed a location-based event search platform** that enables users to discover real-time events nearby, leveraging geolocation and external APIs.
- **Improved user engagement through responsive interface design**, ensuring seamless cross-device access with clean and intuitive layouts.

TECHNICAL SKILLS AND CERTIFICATIONS

Certificates: Harvard CS50

Languages: Java, Python, C/C++, SQL (Postgres), JavaScript, HTML/CSS, R

Frameworks: React, Node.js, Flask, JUnit, WordPress, Material-UI, FastAPI

Libraries: pandas, NumPy, Matplotlib
